**Clean Water Utility**

The Clean Water Utility was established in 2006 to address Federal mandates to improve storm water quality.

Storm water originates from rain, melting snow, and other water that runs off of your property and enters storm water facilities (such as storm sewer, ditches). Storm water facilities eventually lead back to our lakes and rivers.

The Clean Water Utility works to improve both the flow of storm water away from residential areas and the filtering of contaminants (from things such as fertilizer, pet wastes, and vehicle fluids) from water that runs off of every property in the Village.

Funds are collected for the maintenance and future replacement of storm water infrastructure.
